

SILVATECH WORKSHOP

AI for Your Business Masterclass

BZD \$99 | Two live evenings | Belize business owners and professionals

by Silvatech | Official Meta Tech Provider | Member of the OpenAI Partner Network

A practical AI masterclass for Belize business owners and professionals. No technical background is required. Bring a phone or laptop and leave with work you can use in your business.

Who this is for

Business owners, professionals, side hustlers, and people who know AI matters but are not sure where to start. If you can use WhatsApp and Facebook, you can complete the exercises.

What you will learn

- **Ask AI clearly (prompt engineering)** - give useful instructions, business context, and a clear output format so the first draft is easier to use.
- **Choose useful AI tools** - understand where chat assistants and Silvatech's free business tools fit, without trying every new app.
- **Understand context and memory** - learn what an AI knows, what it forgets, and why better background information produces better answers.
- **Recognize agents and automation** - see how AI can complete several connected steps, including customer intake and WhatsApp workflows, with human approval where it matters.
- **Protect your data and set boundaries** - know what not to share, how to check an answer, and what an AI system should never be allowed to do on its own.
- **Put AI to work in real tasks** - create customer replies, ads, quotes, pricing support, and a practical 30-day action plan.

Format

- **Two live evening sessions, 7:00 to 9:00 PM Belize time** - online through Google Meet.
- Hands-on: participants complete each exercise on their own phone or laptop.
- Delivered in English, with Spanish support.
- Includes a workbook, recordings, cohort WhatsApp group, and **Certificate of Completion awarded by Silvatech.**
- Public cohorts are limited to 20-25 participants so the sessions remain practical.

Session 1 - Understand it and use it today

Learn what AI can and cannot do. Compare answers with and without useful context. Practice a simple structure for better prompts, write an ad, respond to a difficult customer, prepare a quote, and learn the basic privacy and verification rules.

Session 2 - Put it to work in your business

Use AI for marketing, pricing, and planning. Build with Silvatech QuickTools. See how agents and workflow automation differ from a normal chat. Finish with a 30-day plan for three tasks, one tool, and one repeated process.

Investment and registration

BZD \$99 per person. Both live sessions, workbook, recordings, WhatsApp group, and certificate are included.

See current dates and availability at <https://consulta.silvatech.bz/workshops/ai-for-your-business>. If no production cohort is open, select **Get the next workshop date**. Only submit payment to a cohort clearly marked as a production payment environment.

Assisted registration: **+501 672-3021** on WhatsApp.

Private workshops for teams

Silvatech adapts the program for companies, banks, utilities, BPOs, government teams, and industry groups. A standard private cohort of up to 25 participants is typically **BZD \$2,500-5,000**. Larger, in-person, and industry-focused programs are quoted by group size, preparation, delivery mode, and subject depth.
